

FLS Series Aqueous Spray Cabinet Parts Washers

Automated Batch Cleaning for Consistent Industrial Results

The FLS Series aqueous spray cabinet washers are automated batch cleaning systems designed for consistent, repeatable removal of oils, grease, machining fluids, and particulate contamination from industrial parts.

Enclosed spray cabinet – closed door

Interior spray manifold with rotating turntable

Key Advantages

- Automated spray cleaning for repeatable results
- Enclosed cabinet reduces overspray and improves safety
- Heated aqueous cleaning solutions
- Turntable or fixed rack configurations
- Ideal for batch and production environments

Typical Applications

- Manufacturing and machining operations
- Automotive and fleet maintenance
- Aerospace components
- Production part cleaning
